PROFILE

Advanced Analytics Delivery Leader with 8+ years of experience managing Data Science, Data Engineering, and BI initiatives across enterprise environments. Proven track record of governing cross-functional analytics teams, stabilizing delivery under dynamic stakeholder demands, and aligning technical outputs with business objectives.

AI-aware and automation-driven professional who actively promotes AI-assisted productivity and process optimization within regulated enterprise settings. Experienced in navigating complex stakeholder ecosystems while ensuring delivery predictability and operational excellence

EXPERIENCE

Lead Project Manager – Advanced Analytics | Octave (John Keells Holdings Data & Analytics COE)
June 2025 - Present

- Leading delivery of enterprise analytics initiatives across Retail, Hospitality, FMCG and Healthcare domains.
- Acted as the operational bridge between business stakeholders and technical teams, translating strategic objectives into structured execution plans.
- Implemented formal scope governance aligned with Program Management principles, driving KPI clarity, data alignment, stakeholder validation, and controlled change management prior to development execution.
- Governing sprint planning, backlog prioritization, and capacity management across multiple workstreams.
- Leveraged AI-assisted workflows to enhance stakeholder analysis, early risk identification, requirement gap assessment, mitigation planning, and governance documentation standardization within regulated enterprise environments.

Project Manager – Innovation | Twinery – Innovation by MAS
May 2024 – June 2025

- Led end-to-end execution of technology-driven innovation initiatives, translating early-stage concepts into validated operational pilots and commercial pathways.
- Coordinated cross-functional teams across R&D, supply chain, engineering, and business units to align technical feasibility with market objectives.

SKILLS

CORE COMPETENCIES

Technical Operations Leadership
Agile Delivery System Design
Cross-Functional Team Alignment
Risk & Stakeholder Management
Structured Execution Planning
Innovation-to-Commercialization Delivery
Data Science & BI Program Coordination
Process & Governance Framework Implementation

TOOLS AND TECHNICAL EXPOSURE

JIRA | Azure Ecosystem
Power BI | MS Fabric | Databricks

LICENSES AND CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate
Microsoft Certified: Azure Fundamentals

- Introduced structured execution frameworks to bring clarity, prioritization, and delivery discipline to innovation workflows.
- Contributed to product validation, go-to-market planning, and annual strategic prioritization of innovation investments.

Major Projects:

- **PERCVD Technology Onshoring & Incubation (Scotland, UK):** Led the technology onshoring process, ensuring smooth transition and setup.
- **Gamer Tech – Wearables & E-commerce:** Managed Shopify integration and product validation through quantitative and qualitative consumer testing. Spearheaded website optimization efforts and digital marketing campaigns to enhance user engagement and conversion rates.

Project Manager | Eimsky
Jan 2024 – April 2024

- Built foundational agile delivery structure within an early-stage environment, introducing Scrum practices, sprint cadences, and backlog governance.
- Implemented JIRA-based workflow systems to improve execution visibility, accountability, and cross-team coordination.
- Led cross-functional software delivery across telecom infrastructure digitization and tolling modernization initiatives under evolving requirements.

Project Manager – Digital Transformation | MAS KREEDA
May 2022 – Jan 2024

- Led multi-factory digital transformation initiatives, aligning digital roadmaps with operational and strategic objectives.
- Implemented governance frameworks to ensure structured execution and compliance across transformation programs.
- Promoted data-driven decision-making through capability-building initiatives and stakeholder engagement.

Business Analyst | Intertek Lanka (PVT.) Ltd
Jan 2018 – April 2022

- Led BI and analytics initiatives supporting operational decision-making and service optimization across enterprise functions.
